

1. Air1 serves me as a resident of the local community because I enjoy hours of wholesome entertainment and news. It is also a great place that my son can listen and I do not have to monitor the information he is getting.

2. If Air1 were to be displaced by an LPFM broadcaster providing other programming our community would lose yet another positive radio station where there are already too few. The concert and ministry information is a valuable help to us. We are informed of situations to donate and help that we would not know about otherwise. We are informed about concerts and news and prayer requests that we would not know about otherwise.

3. I believe that the service provided by Air1 is in the public interest. It provides an alternative to the secular radio which commonly makes sexual references in the name of comedy and is in my opinion, regularly complaining and gossiping negatively about folks in the news. There are not many music stations with which I feel comfortable enough to allow my teenager to listen. Air1 is one of the few. I would sincerely appreciate it if it were not taken off the air. Thank you very much for your time and attention.
